

**Yakumo F&B Co., Ltd.**

***Investor Overview – 2025***

**Building Cambodia's Agri-Industry and Renewable Future**

---

## **Company Overview**

Yakumo F&B Co., Ltd. is a Cambodia-based agribusiness company driving innovation in agriculture, food processing, and renewable energy.

Founded with a commitment to sustainability, local empowerment, and regional export readiness, Yakumo operates across a growing network of farms, factories, and R&D centers in key provinces like Kampong Thom, Preah Vihear, Pursat, Battambang, and Phnom Penh.

---

## **Confirmed Projects (Active Operations)**

### **1. Than Ksan Farm**

📍 Choam Khsant, Preah Vihear

Livestock farm with buffalo, goats, cows, pigs, chicken, and ducks. Preparing for a future slaughterhouse and organic meat production.

### **2. Ang Por Seed Center**

📍 Battambang

Yakumo's rice seed R&D and processing center for supporting contract farmers across Cambodia.

### **3. Water O Processing Factory**

📍 Phnom Penh

Produces mineral water, sachinchi oil, honey, and meat for domestic and international markets.

### **4. Chong Doung Paddy Rice Farm**

- 📍 Baray District, Kampong Thom Province

One of Yakumo's key paddy rice farms, supplying high-quality rice for milling and seed production.

## 5. Osoam Organic Farm

- 📍 Veal Veng District, Pursat

Highland organic farm producing sachi inchi, coffee, vegetables, and seasonal crops with community-based eco-farming practices.

## 6. Prey Veng Contract Rice Farming

- 📍 Prasdach District, Prey Veng Province

100-hectare paddy rice contract farming project with local farmers. Focused on sustainable production and seed integration.

## 7. TPJC Cashew Processing Factory

- 📍 Kampong Thom Province

A high-capacity cashew processing factory (20,000–50,000 tons/year), meeting export standards and sustainability goals.

## 8. Agricultural R&D & Training Program

- 📍 Chbar Ampov High School, Phnom Penh

A collaborative school-based vegetable production and agri-training project for youth and future farmers.

## 9. Cashew Tree Pruning & Pollination Program

- 📍 Kampong Thom Province

Using honeybee-assisted pollination and pruning techniques to improve cashew yield and tree health.

---

## Future Projects (2025–2027 Pipeline)

### 1. Cashew Agro-Industrial Park

- 📍 Preah Vihear & Kampong Thom

A 20,000–50,000 ton/year cashew processing complex with biomass integration, shell recovery, and export-grade preparation. Phase 1 expected by 2026.

### 2. Cashew Drying Yard & Warehouse

 Preah Vihear & Kampong Thom

100,000-ton/year sun drying and storage infrastructure to support farmer collection, sorting, and quality control.

### **3. Biomass Feedstock Supply Chain**

 Preah Vihear & Kampong Thom

Development of a 500,000-ton/year biomass feedstock supply chain, sourcing from wood chips, cashew shells, and other agricultural waste.

### **4. 50MW Biomass Power Plant**

 Preah Vihear & Kampong Thom

A renewable energy power plant using agricultural residues to supply local industry clusters and reduce carbon emissions.

### **5. Slaughterhouse & Meat Processing Facility**

 Than Ksan Farm, Preah Vihear

A modern, hygienic meat processing facility for chilled, value-added, and export-ready meat products.

### **6. Agri-Tech Training & Innovation Hub**

 Phnom Penh (Planned)

Youth-focused training center in smart agriculture, digital tools, regenerative farming, and food entrepreneurship.
